**EN** A continuous 1/2 in. bead of sealant is set into the channel and along the vertical curb notch part. 1/2 in. beads of wedi joint sealant are equally applied on wall surfaces where the curb attaches. A 1/2 in. x 1/2 in. bed of thinset mortar is applied to the subfloor and a skim coat on the bottom surface of the curb as a best practice. The tightly fitting curb is pressed into the connection area. wedi Lean Curbs can be installed by entirely using wedi joint sealant (replaces thinset attachment to floor).

Please note: wedi curb notches are pre-made for channel connections to wedi bases 1 1/2 in. thick at perimeter. When using thicker perimeter bases, please cut the curb notch for a tight dry fit connection.

**ES**

Aplique un cordón continuo de sellador de 0.5 in (12.7 mm) en el interior de la canal y a lo largo de la parte ranurada de sardinel vertical. 1/2 in. beads of wedi joint sealant are equally applied on wall surfaces where the curb attaches. De acuerdo con los mejores procedimientos, se aplica un lecho de mortero cola alisado con una llana ranurada de 0.5 in x 0.5 in (12.7 x 12.7 mm) en el contrapiso y una capa fina en la superficie inferior del sardinel. Presione el sardinel – que encaja a precisión – en el área de conexión. wedi

**FR** Lean Curbs can be installed by entirely using wedi joint sealant (replaces thinset attachment to floor).

Please note: wedi curb notches are pre-made for channel connections to wedi bases 1 1/2 in. thick at perimeter. When using thicker perimeter bases, please cut the curb notch for a tight dry fit connection.

Un cordon continu de produit d'étanchéité de 12.7 mm (1/2 po) est placé dans la rainure et le long de l'encoche verticale de la pièce de seuil. 1/2 in. beads of wedi joint sealant are equally applied on wall surfaces where the curb attaches. Un lit de ciment-colle ratissé avec une truelle dentelée de 12.7 x 12.7 mm (1/2 po x 1/2 po) est appliqué sur le sous-plancher ainsi qu'une couche mince sur la surface inférieure du seuil en tant que meilleure pratique. Le seuil est appliqué sans jeu dans la zone de connexion. wedi Lean Curbs can be installed by entirely using wedi joint sealant (replaces thinset attachment to floor).

Please note: wedi curb notches are pre-made for channel connections to wedi bases 1 1/2 in. thick at perimeter. When using thicker perimeter bases, please cut the curb notch for a tight dry fit connection.

**EN** Weight is applied for a minimum of 30 minutes on and against the curb (from outside) and another 1/2 in. bead of sealant is applied over all curb seams and spread flat. The seams must be covered 1 in. either side of a seam.

**ES** Debe aplicarse peso durante 30 minutos como mínimo sobre y contra el sardinel (desde el exterior) y luego se debe aplicar y allanar otro cordón de sellador de 0.5 pulg. (12.7 mm) sobre todas las uniones del sardinel. Debe cubrirse una pulgada (25.4 mm) por cada lado de las uniones.

**FR** Des poids sont appliqués pour un minimum de 30 minutes contre et sur le seuil (depuis l'extérieur) et un cordon de 12.7 mm (1/2 po) est tiré le long de tous les joints du seuil et étalé. Les joints doivent être étalés sur 25.4 mm (1 po) de part et d'autre d'une ligne de joint.

**EN** Several Fundo Primo models naturally feature different perimeter height or thickness at the edge. Therefore, pre-made standard notch connections of wedi curbs must be modified in the field for a tight fit to the bases. Ramps and Extension panels can naturally not fit to all models and might be modified in the field as well. When using curbs with shower bases and / or Fundo extensions that create a one directional slope and build up height towards one side of the shower, you may need to increase the height of the curb to exceed the surface of the shower base as required by applicable plumbing code. Contact us for recommended best practices under warranty.

**ES** Varios modelos Fundo Primo tienen naturalmente una altura o un espesor diferentes en el borde del contorno. Por tanto, las muescas de conexión estándar preformadas de los sardinales wedi deben modificarse en el sitio de modo que se ajusten precisamente a la medida de las bases. Naturalmente, las rampas y los paneles de extensión pueden no ajustarse a todos los modelos, pero también pueden modificarse en el sitio. **When using curbs with shower bases and / or Fundo extensions that create a one directional slope and build up height towards one side of the shower, you may need to increase the height of the curb to exceed the surface of the shower base as required by applicable plumbing code. Contact us for recommended best practices under warranty.**

**FR** Plusieurs modèles Fundo Primo présentent naturellement une hauteur ou une épaisseur différente sur le bord autour du périmètre. Par conséquent, les encoches de connexion standard préfabriquées des seuils wedi doivent être modifiées sur site pour s'ajuster parfaitement aux bases des receveurs. Naturellement, les rampes et les panneaux d'extension ne s'adaptent pas non plus à tous les modèles et doivent éventuellement aussi être modifiés sur site. **When using curbs with shower bases and / or Fundo extensions that create a one directional slope and build up height towards one side of the shower, you may need to increase the height of the curb to exceed the surface of the shower base as required by applicable plumbing code. Contact us for recommended best practices under warranty.**
